## DESCRIPTION

It's a modular sorter double line for fruit such as: Mandarin, Little Tomatoes, Plums, Lemons, Oranges, Kiwi, Apricots, Paraguayo or Saturn Peach and all fruits of similar form.

The step of the sorter measures 95 mm, available for small/medium/big size fruit.

At the front of the sorter there is a special line suitable both for processing small fruits from fruits flat shape.

The sorter is equipped with an Electronic Boxe and a Weight System dedicated, the Speed Control Sorter and / or is effectuated through an inverter monitored by computer and by operator with automatic mechanisms.

## FEATURES

- Number of Lines: 2-8 (multiples of 2)
- Number of Exits : 2-64 max.
- Speed Max: 12 roller/sec.

Productivity Max	86400 (2 Lines)	172800 (4 Lines)	259200 (6 Lines)	345600 (8 Lines)
Productivity Typ	64800	129600	194400	259200
Productivity Weight*	9072kg/h	18144kg/h	27216kg/h	36288Kg/h

\* productivity calculated on the average of fruits about 140 gr for Peaches

**Productivity is calculated taking care that the calibrating is never stopped on full exits.**
